

SABT Press Release “BITING”

Source: SABT Board
Date: 22 September 2005

The SABT Board accepted a resolution at their meeting held on the 17th Sept. 2005 which clearly states their position and point of view regarding certain dog training with Boerboels.

The SABT will only accept the training of dogs to protect, attack and perhaps bite if this training is done by qualified trainers for utilizing the exceptional qualities of the Boerboel for protecting services like security companies and police services.

Any other training around attacking and biting done by individuals and even breeders is unacceptable and the SABT Board will definitely put disciplinary action into place against any breeder who takes part in such training.
